IIE Transactions (1997) **29**, 1093–1106

DESIGN & MANUFACTURING

AUTHOR INDEX FOR 1997

Adil, G.K., D. Rajamani and D. Strong; *Assignment allocating and simulated annealing algorithms for cell formation*; January; 53

Ammons, J.C., M. Carlyle, L. Cranmer, G. DePuy, K. Ellis, L.F. McGinnis, C.A. Tovey and H. Xu; *Component allocation to balance workload in printed circuit card assembly systems*; April; 265

Askin, R.G., H.M. Selim and A.J. Vakharia; *A methodology for designing flexible cellular manufacturing systems*; July; 599

Banerjee, P., Y. Zhou and B. Montreuil; *Genetically assisted optimization of cell layout and material flow path skeleton*; April; 277

Barendt, N.A., R.D. Quinn, G.C. Causey, F.L. Merrat, D.M. Sargent, W.S. Newman, V.B. Velasco Jr, A. Podgurski, Ju-Yeon Jo, S. Sterling and Yoohwan Kim; *An agile manufacturing workcell design*; October; 901

Barta, T.A., Chang-Chun Tsai and Chao-Hsien Chu; *Modeling and analysis of a manufacturing cell formation problem with fuzzy mixed-integer programming*; July; 533

Bhaskaran, K., Young Hoon Lee and M. Pinedo; *A heuristic to minimize the total weighted tardiness with sequence-dependent setups*; January; 45

Bozer, Y.A. and R.D. Meller; *A reexamination of the distance-based facility layout problem*; July; 549

Carlyle, M., J.C. Ammons, L. Cranmer, G. DePuy, K. Ellis, L.F. McGinnis, C.A. Tovey and H. Xu; *Component allocation to balance workload in printed circuit card assembly systems*; April; 265

Causey, G.C., R.D. Quinn, F.L. Merrat, D.M. Sargent, N.A. Barendt, W.S. Newman, V.B. Velasco Jr, A. Podgurski, Ju-Yeon Jo, S. Sterling and Yoohwan Kim; *An agile manufacturing workcell design*; October; 901

Chang, Ding-Tsair and Ue-Pyng Wen; *The impact on rack configuration on the speed profile of the storage and retrieval machine*; July; 525

Chang, Suk-Hwa and P.J. Egbelu; *Relative pre-positioning of storage/retrieval machines in automated storage/retrieval systems to minimize maximum system response time*; April; 303

Chhajed, D. and U.S. Palekar; *Dominant graphs for rectilinear network design with barriers*; April; 255

Chu, Chao-Hsien, Chang-Chun Tsai and T.A. Barta; *Modeling and analysis of a manufacturing cell formation problem with fuzzy mixed-integer programming*; July; 533

Cranmer, L., J.C. Ammons, M. Carlyle, G. DePuy, K. Ellis, L.F. McGinnis, C.A. Tovey and H. Xu; *Component allocation to balance workload in printed circuit card assembly systems*; April; 265

DePuy, G., J.C. Ammons, M. Carlyle, L. Cranmer, K. Ellis, L.F. McGinnis, C.A. Tovey and H. Xu; *Component allocation to balance workload in printed circuit card assembly systems*; April; 265

DeVor, R., R. Graves and J.J. Mills; *Agile manufacturing research accomplishments and opportunities*; October; 813

Egbelu, P.J. and Suk-Hwa Chang; *Relative pre-positioning of storage/retrieval machines in automated storage/retrieval system to minimize expected system response time*; April; 313

Ellis, K., J.C. Ammons, M. Carlyle, L. Cranmer, G. DePuy, L.F. McGinnis, C.A. Tovey and H. Xu; *Component allocation to balance workload in printed circuit card assembly systems*; April; 265

Fang, Ying-Che and U. Roy; *Optimal tolerance re-allocation for the generative process sequence*; January; 37

Ferreira, P., M. Lawley and S. Revelitis; *Flexible manufacturing system structural control and the Neighborhood Policy, Part 1. Correctness and scalability*; October; 877

Ferreira, P., M. Lawley and S. Revelitis; *Flexible manufacturing system structural control and the Neighborhood Policy, Part 2. Generalization, optimization and efficiency*; October; 889

Fu, M.C. and B.K. Kaku; *Minimizing work-in-process and material handling in the facilities layout problem*; January; 29

Graves, R., R. DeVor and J.J. Mills, *Agile manufacturing research: accomplishments and opportunities*; October; 813

Hedin, S.R., P.R. Philipoom and M.K. Malhotra; *A comparism of static and dynamic tooling policies in a general flexible manufacturing system*; January; 69

Heragu, S.S. and S.R. Kakuturi; *Grouping and placement of machine cells*; July; 561

Iyer, S. and R. Nagi; *Automated retrieval and ranking of similar parts in agile manufacturing*; October; 859

Jo, Ju-Yeon, R.D. Quinn, G.P. Causey, F.L. Merrat, D.M. Sargent, N.A. Barendt, W.S. Newman, V.B. Velasco Jr, A. Podgurski, S. Sterling and Yoohwan Kim; *An agile manufacturing workcell design*; October; 901

Joshi, P. and D. Veeramani; *Methodologies for rapid and effective response to requests for quotation (RFQs)*; October; 825

Kaku, B.K. and M.C. Fu; *Minimizing work-in-process and material handling in the facilities layout problem*; January; 29

Kakuturi, S.R. and S.S. Heragu; *Grouping and placement of machine cells*; July; 561

Karabati, S. and P. Kouvelis; *Flow-line scheduling problem with controllable processing times*; January; 1

Kim, Yoohwan, R.D. Quinn, G.C. Causey, F.L. Merrat, D.M. Sargent, Jo, Ju-Yeon, N.A. Barendt, W.S. Newman, V.B. Velasco Jr, A. Podgurski and S. Sterling; *An agile manufacturing workcell design*; October; 901

Kouvelis, P. and S. Karabati; *Flow-line scheduling problem with controllable processing times*; January; 1

Kusiak, A., T.N. Larson and H. March; *A heuristic approach to warehouse layout with class-based storage*; April; 337

Lamond, B.F. and M.S. Sodhi; *Using tool life models to minimize processing time on a flexible machine*; July; 611

Larson, T.N., H. March and A. Kusiak; *A heuristic approach to warehouse layout with class-based storage*; April; 337

Lawley, M., S. Revelitis and P. Ferreira; *Flexible manufacturing system structural control and the Neighborhood Policy, Part 1. Correctness and scalability*; October; 877

Lawley, M., S. Revelitis and P. Ferreira; *Flexible manufacturing system structural control and the Neighborhood Policy, Part 2. Generalization, optimization and efficiency*; October; 889

Lee, H.F.; *Performance analysis for automated storage and retrieval systems*; January; 15

Lee, Young Hoon, K. Bhaskaran and M. Pinedo; *A heuristic to minimize the total weighted tardiness with sequence-dependent setups*; January; 45

0740-817X © 1997 "IIE"

Malhotra, M.K., S.R. Hedin and P.R. Philipoom; *A comparism of static and dynamic tooling policies in a general flexible manufacturing system*; January; 69
March, H., T.N. Larson and A. Kusiak; *A heuristic approach to warehouse layout with class-based storage*; April; 337
McGinnis, L.F., J.C. Ammons, M. Carlyle, L. Cranmer, K. Ellis, G. DePuy, C.A. Tovey and H. Xu; *Component allocation to balance workload in printed circuit card assembly systems*; April; 865
Meller, R.D. and A. Mungwattana; *Multi-shuttle automated storage/retrieval systems*; October; 925
Meller, R.D. and Y.A. Bozer; *A reexamination of the distance-based facility layout problem*; July; 549
Meller, R.D.; *Optimal order-to-lane assignments in an order accumulation/sortation system*; April; 293
Merrat, F.L., R.D. Quinn, G.C. Causey, D.M. Sargent, N.A. Barendt, W.S. Newman, V.B. Velasco Jr, A. Podgurski, Ju-Yeon Jo, S. Sterling and Yoohwan Kim; *An agile manufacturing workcell design*; October; 901
Mill, F.G., J.C. Naish and J.C. Salmon; *An industry-based study of cutting process capability representation requirements for an integrated simultaneous engineering workstation*; July; 573
Mills, J.J., R. DeVor and R. Graves; *Agile manufacturing research; accomplishments and opportunities*; October; 813
Montreuil, B., P. Banerjee and Y. Zhou; *Genetically assisted optimization of cell layout and material flow path skeleton*; April; 277
Montreuil, B., U. Venkatadri and R.L. Rardin; *A design methodology for fractal layout organization*; October; 911
Mungwattana, A. and R.D. Meller; *Multi-shuttle automated storage/retrieval systems*; October; 925

Nagi, R. and L. Song; *Design and implementation of a virtual information system for agile manufacturing*; October; 839
Nagi, R. and S. Iyer; *Automated retrieval and ranking of similar parts in agile manufacturing*; October; 859
Naish, J.C., F.G. Mill and J.C. Salmon; *An industry-based study of cutting process capability representation requirements for an integrated simultaneous engineering workstation*; July; 573
Newman, W.S., R.D. Quinn, G.C. Causey, F.L. Merrat, D.M. Sargent, N.A. Barendt, V.B. Velasco Jr, A. Podgurski, Ju-Yeon Jo, S. Sterling and Yoohwan Kim; *An agile manufacturing workcell design*; October; 901

Palekar, U.S. and D. Chhajed; *Dominant graphs for rectilinear network design with barriers*; April; 255
Philipoom, P.R., S.R. Hedin and M.K. Malhotra; *A comparism of static and dynamic tooling policies in a general flexible manufacturing system*; January; 69
Pinedo, M., Young Hoon Lee and K. Bhaskaran; *A heuristic to minimize the total weighted tardiness with sequence-dependent setups*; January; 45
Podgurski, D.M., R.D. Quinn, G.C. Causey, F.L. Merrat, D.M. Sargent, N.A. Barendt, W.S. Newman, V.B. Velasco Jr, Ju-Yeon Jo, S. Sterling and Yoohwan Kim; *An agile manufacturing workcell design*; October; 901

Quinn, R.D., G.C. Causey, F.L. Merrat, D.M. Sargent, N.A. Barendt, W.S. Newman, V.B. Velasco Jr, A. Podgurski, Ju-Yeon Jo, S. Sterling and Yoohwan Kim; *An agile manufacturing workcell design*; October; 901

Rajamani, D., G.K. Adil and D. Strong; *Assignment allocation and simulated annealing algorithms for cell formation*; January; 53
Rardin, R.L., U. Venkatadri and B. Montreuil; *A design methodology for fractal layout organization*; October; 911
Revelitis, S., M. Lawley and P. Ferreira; *Flexible manufacturing system structual control and the Neighborhood Policy, Part 1. Correctness and scalability*; October; 877
Revelitis, S., M. Lawley and P. Ferreira; *Flexible manufacturing system structual control and the Neighborhood Policy, Part 2. Generalization, optimization and efficiency*; October; 889
Roy, U. and Ying-Che Fang; *Optimal tolerance re-allocation for the generative process sequence*; January; 37

Salmon, J.C., J.C. Naish and F.G. Mill; *An industry-based study of cutting process capability representation requirements for an integrated simultaneous engineering workstation*; July; 573
Sargent, D.M., R.D. Quinn, G.C. Causey, F.L. Merrat, N.A. Barendt, W.S. Newman, V.B. Velasco Jr, A. Podgurski, Ju-Yeon Jo, S. Sterling and Yoohwan Kim; *An agile manufacturing workcell design*; October; 901
Selim, H.M., R.G. Askin and A.J. Vakharia; *A methodology for designing flexible cellular manufacturing systems*; July; 599
Sinriech, D. and J.M.A. Tanchoco; *Design procedures and implementation of the segmented flow topology (SFT) for discrete material flow systems*; April; 323
So, K.C.; *Optimal buffer allocation strategy for minimizing work-in-process inventory in unpaced production lines*; January; 81
Sodhi, M.S. and B.F. Lamond; *Using tool life models to minimize processing time on a flexible machine*; July; 611
Song, L. and R. Nagi; *Design and implementation of a virtual information system for agile manufacturing*; October; 839
Sterling, S., R.D. Quinn, G.C. Causey, F.L. Merrat, D.M. Sargent, N.A. Barendt, W.S. Newman, A. Podgurski, Ju-Yeon Jo, V.B. Velasco Jr and Yoohwan Kim; *An agile manufacturing workcell design*; October; 901
Strong, D., G.K. Adil and D. Rajamani; *Assignment allocation and simulated annealing algorithms for cell formation*; January; 53

Tanchoco, J.M.A. and D. Sinriech; *Design procedures and implementation of the segmented flow topology (SFT) for discrete material flow systems*; April; 323
Taylor, G.D.; *Design for global manufacturing and assembly*; July; 585
Tovey, C.A., K. Ellis, J.C. Ammons, M. Carlyle, L. Cranmer, G. DePuy, L.F. McGinnis and H. Xu; *Component allocation to balance workload in printed circuit card assembly systems*; April; 265
Tsai, Chang-Chun, Chao-Hsien Chu and T.A. Barta; *Modeling and analysis of a manufacturing cell formation problem with fuzzy mixed-integer programming*; July; 533

Vakharia, A.J., Askin, R.G. and H.M. Selim; *A methodology for designing flexible cellular manufacturing systems*; July; 599
Veeramani, D. and P. Joshi; *Methodologies for rapid and effective response to requests for quotation (RFQs)*; October; 825
Velasco, V.B. Jr, R.D. Quinn, G.C. Causey, F.L. Merrat, D.M. Sargent, N.A. Barendt, W.S. Newman, A. Podgurski, Ju-Yeon Jo, S. Sterling and Yoohwan Kim; *An agile manufacturing workcell design*; October; 901
Venkatadri, U., R.L. Rardin and B. Montreuil; *A design methodology for fractal layout organization*; October; 911

Wen, Ue-Pyng and Ding-Tsair Chang; *The impact on rack configuration on the speed profile of the storage and retrieval machine*; July; 525

Xu, H., L.F. McGinnis, J.C. Ammons, M. Carlyle, L. Cranmer, K. Ellis, G. DePuy and C.A. Tovey; *Component allocation to balance workload in printed circuit card assembly systems*; April; 265

Zhou, Y., P. Banerjee and B. Montreuil; *Genetically assisted optimization of cell layout and material flow path skeleton*; April; 277

SUBJECT INDEX FOR 1997

1010

Iyer, S. and R. Nagi; *Automated retrieval and ranking of similar parts in agile manufacturing*; October; p. 859

1020

Taylor, C.D.; *Design for global manufacturing and assembly*; July; p. 585.

1120

Quinn, R.D., G.C. Causey, F.L. Merat, D.M. Sargent, N.A. Barendt, W.S. Newman, V.B. Velasco Jr., A. Podgurski, J-Y. Jo, L.S. Sterling and Y. Kim; *An agile manufacturing workcell design*; October; p. 901.

1280

Ammons, J.C., M. Carlyle, L. Cranmer, G. DePuy, K. Ellis, L.F. McGinnis, C.A. Tovey and H. Xu; *Component allocation to balance workload in printed circuit card assembly systems*; April; p. 265

1320

Adil, G.K., D. Rajamani and D. Strong; *Assignment allocation and simulated annealing algorithms for cell formation*; January; p. 15.

Askin, R.G., H.M. Selim and A.J. Vakharia; *A methodology for designing flexible cellular manufacturing systems*; July; p. 599.

DeVor, R., R. Graves and J.J. Mills; *Agile manufacturing research: accomplishments and opportunities*; October; p. 813.

1330

Lee, H.F.; *Performance analysis for automated storage and retrieval systems*; January; p. 15.

Veeramani, D. and P. Joshi; *Methodologies for rapid and effective response to requests for quotation (RFQs)*; October; p. 825

1340

Tsai, C-C., C-H. Chu and T.A. Barta; *Modeling and analysis of a manufacturing cell formation problem with fuzzy mixed-integer programming*; July; p. 533.

Heragu, S.S. and S.R. Kakuturi; *Grouping and placement of machine cells*; July; p. 561.

Venkatadri, U., R.L. Rardin and B. Montreuil; *A design methodology for fractal layout organization*; October; p. 911.

1350

Karabati, S. and P. Kouvells; *Flow-line scheduling problem with controllable processing times*; January; p. 1.

1360

Fu, M.C. and B.K. Kaku; *Minimizing work-in-process and material handling in the facilities layout problem*; January; p. 29.

Roy, U. and Y-C. Fang; *Optimal tolerance re-allocation for the generative process sequence*; January; p. 37.

Lee, Y.-H., K. Bhaskaran and M. Pinedo; *A heuristic to minimize the total weighted tardiness with sequence-dependent setups*; January; p. 45

1370

Song, L. and R. Nagi; *Design and implementation of a virtual information system for agile manufacturing*; October; p. 839

1410

Chhajed, D. and U.S. Palekar; *Dominant graphs for rectilinear network design with barriers*; April; p. 255.

Meller, R.D.; *Optimal order-to-lane assignments in an order accumulation/sortation system*; April; p. 293.

Bozer, Y.A. and R.D. Meller; *A reexamination of the distance-based facility layout problem*; July; p. 549.

Meller, R.D. and A. Mungwattana; *Multi-shuttle automated storage/retrieval systems*; October; p. 925.

1420

Chang, S.-H. and P.J. Egbelu; *Relative pre-positioning of storage/retrieval machines in automated storage/retrieval systems to minimize maximum system response time*; April; p. 303

1440

Larson, T.N., H. March and A. Kusiak; *A heuristic approach to warehouse layout with class-based storage*; April; p. 337.

Chang, D.-T. and U.-P. Wen; *The impact on rack configuration on the speed profile of the storage and retrieval machine*; July; p. 525

1460

Banerjee, P., Y. Zhou and B. Montreuil; *Genetically assisted optimization of cell layout and material flow path skeleton*; April; p. 277.

Sinriech, D. and J.M.A. Tanchoco; *Design procedures and implementation of the segmented flow topology (SFT) for discrete material flow systems*; April; p. 323.

1520

Naish, J.C., F.G. Mill and J.C. Salmon; *An industry-based study of cutting process capability representation requirements for an integrated simultaneous engineering workstation*; July; p. 573.

1535

Lawley, M., S. Reveliotis and P. Ferreira; *Flexible manufacturing system structural control and the neighborhood policy, part 1. correctness and scalability*; October; p. 877.

Lawley, M., S. Reveliotis and P. Ferreira; *Flexible manufacturing system structural control and the neighborhood policy, part 2. generalization, optimization, and efficiency*; October; p. 889.

1550

Hedin, S.R., P.R. Philipoom and M.K. Malhotra; *A comparison of static and dynamic tooling policies in a general flexible manufacturing system*; January; p. 69.

So, K.C.; *Optimal buffer allocation strategy for minimizing work in process inventory in unpaced production lines*; January; p. 81.

Lamond, B.F. and M.S. Sodhi; *Using tool Life models to minimize processing time on a flexible machine*; July; p. 611.

GUEST REVIEWERS FOR 1997

E.I. Agba, Mississippi State University
Dave Anderson, Purdue University

Adedeji Badiru, University of Oklahoma
Sherman Bai, University of Florida
Pat Banerjee, University of Illinois

Laura Burke, Lehigh University
J.S. Busby, Cranfield University

Tom M. Cavalier, Pennsylvania State University
Frank Chen, University of Toledo

Cihan Dagli, University of Missouri-Rolla
Sanjay Dhande, Indian Institute of Technology-Kanpur
Jian Dong, University of Connecticut
Debasish Dutta, University of Michigan

Salah E. Elmaghraby, North Carolina State University
Emory Enscore, The Pennsylvania State University

Wolter Fabrycky, Virginia Tech
Emmanuel Fernandez-Gaucher, University of Arizona
Timothy S. Flaherty, TIRA Consultants
Ed Frazelle, Georgia Institute of Technology

Rajit Gadh, University of Wisconsin-Madison
Roger Glassey, University of California-Berkeley
B. Gopalakrishnan, West Virginia University
David Gossard, Massachusetts Institute of Technology
P. Gu, University of Calgary

Catherine M. Harmonosky, The Pennsylvania State University
Willy Herroelen, Katholieke Universiteit Leuven, Belgium
Wallace Hopp, Northwestern University

Shahrukh Irani, Ohio State University
Anand Iyer, I2 Technologies

John Jackman, Iowa State University
Robert Jerard, University of New Hampshire
Eric Johnson, Vanderbilt University

Mehran Kamran, Structural Dynamic Research
James Kang, Structural Dynamic Research
Moutaz Khouja, The University of North Carolina
Justin Kidder, University of Pittsburgh
D.L. Kimbler, Clemson University
Russell King, North Carolina State University
Rainer Kolisch, Christian-Albrechts-Universitat zu Kiel
Takis Konstantopoulos, University of Texas at Austin
Panagiotis Kouvelis, Duke University
Sundar Krishnamurty, University of Massachusetts
Ehud Kroll, Texas A&M University and U. of Missouri-Kansas City
P.R. Kumar, University of Illinois

Tom Lacksonen, Ohio University
Andre' Langevin, Ecole Polytechnique de Montreal and GERAD
Y.S. Lee, North Carolina State University
Ivan B.H. Lee, Nanyang Technological University, Singapore
C.H. Lee, National University of Singapore
Moon-Kyu Lee, Keimyung University
Hsu-Chang Liu, University of Massachusetts
Tien Lun Liu, University of Pittsburgh

Layek Abdel-Malek, New Jersey Institute of Technology
Manoj Malhotra, University of South Carolina
Charles Malmborg, Rensselaer Polytechnic Institute
Louis Martin-Vega, Lehigh University
Richard Mayer, Texas A&M University
D.J. Medeiros, Penn State University
Semyon M. Meerkov, University of Michigan
Brian Melloy, Clemson University
Ioannis Minis, University of Maryland

SCHEDULING AND LOGISTICS

AUTHOR INDEX FOR 1997

Agnetis, A., R. Macchiaroli, D. Pacciarelli and F. Rossi; *Assigning jobs to time frames on a single machine to minimize total tardiness*; November; 965

Agrawal, V., M.A. Cohen and Yu-Sheng Zheng; *Service parts logistics: a benchmark analysis*; August; 627

Anupindi, R. and Y. Bassok; *Analysis of supply contracts with total minimum commitment*; May; 373

Axsäter, S.; *Simple evaluation of echelon stock (R,Q) policies for two-level inventory systems*; August; 661

Azizoglu, M. and S. Webster; *Scheduling about an unrestricted common due window with arbitrary earliness/tardiness penalty rates*; November; 1001

Bassok, Y. and R. Anupindi; *Analysis of supply contracts with total minimum commitment*; May; 373

Benjaafar, S. and M. Sheikhzadeh; *Scheduling policies, batch sizes, and manufacturing lead times*; February; 159

Berk, E., K. Moinzadeh and T. Klastorin; *The impact of small lot ordering on traffic congestion in a physical distribution system*; August; 671

Bourland, K.E. and C.A. Yano; *A comparison of solution approaches for the fixed-sequence economic lot scheduling problem*; February; 103

Bourland, K.E., M.J. Brown and C.A. Yano; *The product cycling problem under increasing yield rates*; May; 417

Braca, J., J. Bramel, B. Posner and D. Simchi-Levi; *A computerized approach to the New York City School bus routing problem*; August; 693

Bramel, J., J. Braca, B. Posner and D. Simchi-Levi; *A computerized approach to the New York City school bus routing problem*; August; 693

Brown, M.J., K.E. Bourland and C.A. Yano; *The product cycling problem under increasing yield rates*; May; 417

Carrillo, J.E. and R.L. Daniels; *β*-Robust scheduling for single-machine systems with uncertain processing times; November; 977

Choi, In-Chan and Seong-In Kim; *An optimal path of a moving vehicle on a sphere*; May; 383

Co, H.C. and M. Sharafali; *Overplanning factor in Toyota's formula for computing the number of kanban*; May; 409

Cohen, M.A., Yu-Sheng Zheng and V. Agrawal; *Service parts logistics: a benchmark analysis*; August; 627

Cui, Xian-Yu, Hong-Sen Yan, Ning-Sheng Wang and Jin-Ge Zhang; *Modeling, scheduling and control of flexible manufacturing systems by extended high-level evaluation Petri nets*; February; 147

Daniels, R.L. and J.E. Carrillo; *β*-Robust scheduling for single-machine systems with uncertain processing times; November; 977

Dessouky, M.M. and B.A. Kijowski; *Production scheduling of single-stage multi-product batch chemical processes with fixed batch sizes*; May; 399

Dietz, D.C. and M. Rosenshine; *Optimal specialization of a maintenance workforce*; May; 423

Drexl, A. and R. Kolisch; *Local search for nonpreemptive multi-mode resource-constrained project scheduling*; November; 987

Drezner, Z. and G.O. Wesolowsky; *On the best location of signal detectors*; November; 1007

Erkip, N., R. Güllü and E. Önol; *Analysis of a deterministic demand production/inventory system under nonstationary supply uncertainty*; August; 703

Eynan, A. and Chung-Lun Li; *Lot-splitting decisions and learning effects*; February; 139

Gallego, G. and D.X. Shaw; *Complexity of the ELSP with general cyclic schedules*; February; 109

Garg, A. and C.S. Tang; *On postponement strategies for product families with multiple points of differentiation*; August; 641

Ge, G., T.J. Hodgson, R.E. King and H. Said; *Dynamic lot size/sequencing policies in a multi-product, single-machine system*; February; 127

Gue, K.R., G.L. Newhauser and M. Padron; *Production scheduling in almost continuous time*; May; 391

Güllü, R., E. Önol and N. Erkip; *Analysis of a deterministic demand production/inventory system under nonstationary supply uncertainty*; August; 703

Hall, N.G., F.M. Julien and M.J. Magazine; *Generalized preemption models for single-machine dynamic scheduling problems*; May; 359

Hausman, W.H. and E. Schraner; *Optimal production operations sequencing*; August; 651

Hill, A.V., A.S. Raturi and Chee-Chuong Sum; *Capacity-constrained reorder intervals for materials requirements planning systems*; November; 951

Hodgson, T.J., G. Ge, R.E. King and H. Said; *Dynamic lot size/sequencing policies in a multi-product, single-machine system*; February; 127

Julien, F.M., M.J. Magazine and N.G. Hall; *Generalized preemption models for single-machine dynamic scheduling problems*; May; 359

Kijowski, B.A. and M.M. Dessouky; *Production scheduling of single-stage multi-product batch chemical processes with fixed batch sizes*; May; 399

Kim, Seong-In and In-Chan Choi; *An optimal path of a moving vehicle on a sphere*; May; 383

King, R.E., T.J. Hodgson, G. Ge and H. Said; *Dynamic lot size/sequencing policies in a multi-product, single-machine system*; February; 127

Klastorin, T., K. Moinzadeh and E. Berk; *The impact of small lot ordering on traffic congestion in a physical distribution system*; August; 671

Kolisch, R. and A. Drexl; *Local search for nonpreemptive multi-mode resource-constrained project scheduling*; November; 987

SUBJECT INDEX FOR 1997

2320
Dietz, D.C. and M. Rosenshine; *Optimal specialization of a maintenance workforce*; May; p. 423

3000
Güllü, R., E. Önol and N. Erkip; *Analysis of a deterministic demand production/inventory system under nonstationary supply uncertainty*; August; p. 703

3030
Co, H.C. and M. Sharafali; *Overplanning factor in Toyota's formula for computing the number of kanban*; May; p. 409

3040
Hill, A.V., A.S. Raturi and C.-C. Sum; *Capacity-constrained reorder intervals for materials requirements planning systems*; November; p. 951

3050
Axsäter, S.; *Simple evaluation of echelon stock (R,Q) policies for two-level inventory systems*; August; p. 661

3070
Bourland, K.E., M.J. Brown and C.A. Yano; *The product cycling problem under increasing yield rates*; May; p. 417

3090
Bassok, Y. and R. Anupindi; *Analysis of supply contracts with total minimum commitment*; May; p. 373

3140
Weng, Z.K.; *Pricing and ordering strategies in manufacturing and distribution alliances*; August; p. 681

3150
Cohen, M.A., Y.-S. Zheng and V. Agrawal; *Service parts logistics: a benchmark analysis*; August; p. 627
Garg, A. and C.S. Tang; *On postponement strategies for product families with multiple points of differentiation*; August; p. 641

3210
Moinzadeh, K., T. Klastorin and E. Berk; *The impact of small lot ordering on traffic congestion in a physical distribution system*; August; p. 671

3225
Drezner, Z. and G.O. Wesolowsky; *On the best location of signal detectors*; November; p. 1007

3250
Braca, J., J. Bramel, B. Posner and D. Simchi-Levi; *A computerized approach to the New York City School bus routing problem*; August; p. 693

3255
Kim, S.-I. and I.-C. Choi; *An optimal path of a moving vehicle on a sphere*; May; p. 383

3340
Schraner, E. and W.H. Hausman; *Optimal production operations sequencing*; August; p. 651

3400
Metters, R.; *Production planning with stochastic seasonal demand and capacitated production*; November; p. 1017

3420
Luxhøj, J.T., T.P. Williams and H.-J. Shyur; *Comparison of regression and neural network models for prediction of inspection profiles for aging aircraft*; February; p. 91

3470
Bourland, K.E. and C.A. Yano; *A comparison of solution approaches for the fixed-sequence economic lot scheduling problem*; February; p. 103
Gallego, G. and D.X. Shaw; *Complexity of the ELSP with general cyclic schedules*; February; p. 109
Hodgson, T.J., G. Ge, R.E. King and H. Said; *Dynamic lot size/sequencing policies in a multi-product, single-machine system*; February; p. 127
Eynan, A. and C.-L. Li; *Lot-splitting decisions and learning effects*; February; p. 139
Stowers, C.L. and U.S. Palekar; *Lot sizing problems with strong set-up interactions*; February; p. 167

3500
Julien, F.M., M.J. Magazine and N.G. Hall; *Generalized preemption models for single-machine dynamic scheduling problems*; May; p. 359

3520
Leon, V.J. and B. Ramamoorthy; *An adaptable problem-space-based search method for flexible flow line scheduling*; February; p. 115

3530
Agnetis, A., R. Macchiaroli, D. Pacciarelli and F. Rossi; *Assigning jobs to time frames on a single machine to minimize total tardiness*; November; p. 965
Daniels, R.L. and J.E. Carrillo; *β-Robust scheduling for single-machine systems with uncertain processing times*; November; p. 977
Vairaktarakis, G.L.; *Analysis of scheduling algorithms for master-slave systems*; November; p. 939
Azizoglu, M. and S. Webster; *Scheduling about an unrestricted common due window with arbitrary earliness/tardiness penalty rates*; November; p. 1001
Gue, K.R., G.L. Newhauser and M. Padron; *Production scheduling in almost continuous time*; May; p. 391
Dessouky, M.M. and B.A. Kijowski; *Production scheduling of single-stage multi-product batch chemical processes with fixed batch sizes*; May; p. 399

3540
Kolisch, R. and A. Drexl; *Local search for nonpreemptive multi-mode resource-constrained project scheduling*; November; p. 987

3560
Yan, H.-S., N.-S. Wang, Xian-Yu Cui and Jin-Ge Zhang; *Modeling, scheduling and control of flexible manufacturing systems by extended high-level evaluation Petri nets*; February; p. 147
Benjaafar, S. and M. Sheikhzadeh; *Scheduling policies, batch sizes, and manufacturing lead times*; February; p. 159

3580
Sox, C.R. and J.A. Muckstadt; *Optimization-based planning for the stochastic lot-scheduling problem*; May; p. 349

Ohta, H. and M.A. Rahim; *A dynamic economic model for an $\bar{x}$-control chart design*; June; p. 481

Das, T.K., V. Jain and A. Gosavi; *Economic design of dual-sampling interval policies for $\overline{X}$ charts with and without run rules*; June; p. 497

Das, T.K. and V. Jain; *An economic design model for $\overline{X}$ charts with random sampling policies*; June; p. 507

Nikolaidis, Y., D. Psoinos and G. Tagaras; *A more accurate formulation for a class of models for the economic design of control charts*; December; p. 1031

Klein, M.; *Modified Shewhart-exponentially weighted moving average control charts*; December; p. 1051

2330

Aka, M., S.M. Gilbert and P. Ritchken; *Joint inventory/replacement policies for the parallel machines*; June; p. 441

2335

Shaoxiang, Chen and M. Lambrecht; *The optimal frequency and sequencing of tests in the inspection of multicharacteristic components*; December; p. 1039

GUEST REVIEWERS FOR 1997

Susan Albin, Rutgers University
Frank B. Alt, University of Maryland
Layth C. Alwan, University of Wisconsin-Milwaukee
Bruce Ankeman, Northwestern University
Jessie Arnold, VPI & SU
Hayriye Ayban, Georgia Institute of Technology

N. Balakrishnan, McMaster University
A.K. Bansal, University of Delhi
Russell Barton, The Pennsylvania State University
Frank Beichelt, University of the Witwatersrand
Julie Berube, University of Michigan
Christopher J. Burges, Bell Laboratories
Jai-Hyun Byun, Gyeongsang National University

James Calvin, Texas A&M University
Charles W. Champ, Georgia Southern University
Shing I. Chang, Kansas State University
Argon Chen, National Taiwan University
Gaungming Chen, Morgen State University
Y.C. Chien, Bell Laboratories
Hong-Jen Chiu, National Taiwan Institute of Technology
B.R. Cho, Clemson University
David Coit, Rutgers University
Deborah F. Cook, Virginia Tech
Robert Cooper, Florida Atlantic University
Antonio Fernando Branco Costa, UNESP- Campus de Guaratingueta
Stephen V. Crowder, Sandia National Laboratories

Tapas K. Das, University of South Florida
Enrique Del Castillo, University of Texas at Arlington
Zvi Drezner, California State University
R.A. Dudek, Texas Tech. University
S.O. Duffuaa, King Fahd University of Petroleum and Minerals

Alan E. Ebrahimi, Northern Illinois University
Elsayed A. Elsayed, Rutgers University
John English, University of Arkansas
Luis A. Escobar, Louisiana State University
R.J. Easterling, Sandia National Laboratories

Nasser S. Fard, Northeastern University
Nicholas R. Farnum, California State University, Fullerton
Richard Feldman, Texas A&M University
Flavio Fogliatto, Rutgers University
Joe Foster, Texas A&M University

F.F. Gan, National University of Singapore
A.E. Gelford, University of Connecticut
Richard J. Gerth, Ohio University

A.J. Hayter, Georgia Institute of Technology
Russell Heikes, Georgia Institute of Technology
Sung-Hoon Hong, Rutgers University
Eva Hudlicka, Psychometerix
Garry Huysse, Procter & Gamble

John Imhoff, University of Arkansas
Armann Ingolfsson, University of Alberta

A.K. Jain, Lucent Technologies
Donsig Jang, Texas A&M University

J. Bert Keats, Arizona State University
Andre' Khuri, University of Florida
Johan de Kleer, Xerox Palo Alto Research Center
Morton Klein, Columbia University
Georgia-Ann Klutke, National Science Foundation
John Kobza, Virginia Polytechnic Institute & State University
Nasser Korra, Ain Shams University
Samuel Kotz, University of Maryland

Tze Leung Lai, Stanford University
Johannes Ledolter, University of Iowa
Hau Lee, Stanford University
Lawrence Leemis, The College of William and Mary
Pierre Lefrancois, Laval University
Joege Leon, Texas A&M University
Ming Liang, University of Ottowa
Regina Liu, Rutgers University
Cynthia Lowry, Texas Christian University
C.J. Lu, National Cheng-Kung University
John M. Lucas, Wilmington, DE
Michael Lyu, Lucent Technologies

John F. MacGregor, McMaster University
Christina Mastrangelo, University of Virginia
Mainak Mazumdar, University of Pittsburgh

Edward D. McDowell, Oregon State University
Cesar A. Acosta Mejia, Instituto Tecnologico Autonomo de Mexico
William S. Messina, Chrysler Corporation
Douglas Montgomery, Arizona State University
Herbert Moskowitz, Purdue University

V.N. Nair, University of Michigan
Toshio Nakagawa, Meijo University
M.M. Ncube, University of West Florida
Lloyd S. Nelson, Londonderry, NH
Peter R. Nelson, Clemson University

Shunji Osaki, Hiroshima University

O. Geoffrey Okogbaa, University of South Florida

Hoang Pham, Rutgers University
Joseph Pignatiello, Texas A&M University
Sharad S. Prabhu, SAS Institute, Inc.
Sesh Prativadi, Eastman Kodak

Charles Quesenberry, North Carolina State University

Darrell Radson, University of Wisconsin-Milwaukee
M.A. Rahim, University of New Brunswick
Marion R. Reynolds, Jr., Virginia Polytechnic Institute
Jose Luis Duarte Ribeiro, Av. Cel. Lucas De Oliveria
Meir Rosenblatt, Washington University
Michael H. Rothkopf, RUTCOR – Rutgers Center for Operations Research
George Runger, University of Maryland
Sarah M. Ryan, University of Nebraska-Lincoln
Thomas P. Ryan, Case Western Reserve University

Emanuel M. Sachs, Massachusetts Inst. of Tech.
C.I. Saraidaridis, Bell Laboratories
Tap Sastri, Texas A&M University
Thomas Savits, University of Pittsburgh
Neil C. Schwertman, California State University
Takashi Seo, Hiroshima University
J. Jan Shi, The University of Michigan
Irv Shiffer, Ethicon
James R. Simpson, United States Airforce Academy
Minoru Siotani, Meisei University
James L. Smith, Texas Tech. University
Jeff Smith, Texas A&M University
Milton Smith, Texas Tech. University
Jingsheng Song, Columbia University
Stephan H. Steiner, University of Waterloo
Robert Storer, Lehigh University
Zachary Stoumbos, Rutgers University

George Tagaras, Aristoteles University of Thessaloniki
Jen Tang, Purdue University
Kwei Tang, Louisiana State University
William Thompson, University of Missouri
George C. Tiao, University of Chicago
Michael Tortorella, Lucent Technologies
Kwok-Leung Tsui, Hong Kong University of Science & Technology

S.A. Vander Wiel, Bell Laboratories
Stephen B. Vardeman, Iowa State University

Don G. Wardell, University of Utah
Gary Wasserman, Wayne State University
George Wesolowsky, McMaster University
Thomas Willemain, RPI
William Woodall, The University of Alabama
Marty Wortman, Texas A&M University
Minglu Wu, City University of Hong Kong

Kai Yang, Wayne State University
Emmanuel Yashchin, Thomas J. Watson Research Center
Ruey Huei Yeh, National Taiwan Institute of Technology
B.J. Yum, Korea Advanced Institute of Science and Technology

Nick Zaino, Eastman Kodak
Dror Zuckerman, The Hebrew University
